ELECTRIC ENGINEERING COMMITTEE
Summary of Meeting No. 3

Time : Monday, September 20, 1954; 9:30 a.m. - 12:00 Noon
Place: Room 1349, South Building, USDA

Present:

Members	Alternates	Others
G. H. Cole (SE)	C. E. Moore (NE)	R. M. Gaver
G. L. Woodworth (NC)	C. L. Hollister (W)	W. E. Rushlow
R. P. Stokely (SW)		W. Woehler
G. K. Ditlow, Chairman		D. A. Wicker
E. A. Loetterle, Secretary		

The Chairman convened the meeting with a request for comments on the summary of Meeting No. 2. The secretary was requested to briefly review the agenda items discussed at the previous meeting. Following the review there was a brief discussion concerning the summary and it was agreed that the summary was satisfactory.

Agenda Item No. 9. "Topics for possible inclusion on the program for the Technical Training Meetings for Washington Engineering Personnel (Electric Program)"

The Chairman introduced the agenda item for discussion. The possibility of having one of the topics to be presented at the January Technical Field Conference ready for the next Training Meeting was considered. The Chairman mentioned the possibility of having Mr. Amadon or Mr. Thompson give the talks they are preparing for the Technical Conference.

There followed some discussion concerning the seriousness of the pole maintenance problem, particularly in the North Central and Western Areas and the appropriateness of a talk by Mr. Amadon at this time. All were in favor of such a talk if it could be arranged.

It was agreed that it would be advisable to proceed with the plan of presenting the Washington engineering staff the topics that have been presented and will be presented at the technical field conferences.

Agenda Item No. 10. "Summary of construction costs for distribution and transmission lines and substations."

Mr. Woehler has been working for sometime on the project identified by the title above. The project is nearly complete and he was invited to attend this meeting to give the members some information concerning his project. Mr. Woehler explained that the cost figures in the tabulations were based on final inventories received within the past two years and that the prices are average for the nation which have been adjusted to today's price level. Draft copies of the tabulations were distributed and there was considerable discussion concerning their composition and the data included in the tabulations.

taken to secure more draftsmen time but the situation is serious-EDIVISION.)

Agenda Item No. 15. "Aluminum Coated Guy Wire" (Acco-Alumanized)(Hot-Dip Coated Steel Wire)

Mr. Wicker informed the committee of an application submitted by the Page Steel and Wire Division of the American Chain and Cable Company for acceptance of their "alumanized" steel wire. The wire is coated with aluminum which is applied by a dipping process. The application will not be presented to the Technical Standards Committee. Approval has been given to allow the company to sell a maximum of 2000 feet to any borrower and the company is required to keep record of all sales showing the amount sold and the name of the purchaser. There was some discussion concerning the above information supplied by Mr. Wicker which resulted in general concurrence in the action taken.

Agenda Item No. 16. "Secondary Losses"

It was decided to postpone discussion of this item until the next meeting and proceed to the next item.

Agenda Item No. 17. "Recent Developments in Staff Engineering"

Review of O & M Reports

The Chairman reported that the Electric Engineering Division will soon be making a special analysis of the O & M reports submitted within the past year. He stated that in order to be sure that all reports are reviewed the area offices will be visited to obtain copies of reports that are not available in the files of the Engineering Division.

The meeting adjourned at approximately 12:00 Noon, and the next meeting is to be held on call by the Chairman.
